MD - Mike Kershaw

Letter of introduction . . .

Please accept this letter as a formal introduction to our company and services.

Established in 1985 Industrial Insulation Services are thermal insulation contractors.

Pipework Insulation and Cladding Services:

IIS (Industrial Insulation Services) are thermal insulation contractors / thermal insulation engineers and provide a complete range of thermal insulation and installation and protection for pipework and fittings, vessels, boilers, ductwork and tanks in high or low temperature service.

We install insulation from the smallest pipe which is 1/2" NB to 1 metre diameter and beyond if necessary. We cover a range of temperatures from - 60 degrees C to over 1000 degrees C. The materials we use varies depending on the duty of the pipework - more details at our website.

With total independence of operation, IIS is at liberty to advise impartially on the optimal choice of materials and finishes available from leading manufacturers - thus enabling best possible specifications to be drawn up in answer to customers' precise requirements. This freedom from constraint is of particular value in responding to the specific needs of specialised technologies such as those involved in food manufacturing and processing, or in controlled environment situations.

Industrial Insulation Services are a SME with over 30 years experience within the insulation industry.

Thermal Insulation Covers:

Mike Kershaw (MD - Industrial Insulation Services) is married to the owner of **LK Thermal Covers**, Lesley Kershaw; and whilst they run 2 distinct ventures, Lesley is able to call upon Mike for technical support to help as and when required, and is able to maximise her skills in technical pattern design, stitchery and material composition to provide high quality and inexpensive thermal insulation covers - more details at www.lkthermalcovers.co.uk

LK Thermal Covers advise on, design and supply bespoke covers / jackets / blankets to suit specific customer requirements and provide excellent, efficient and cost effective performance in different working environments.

I will keep in contact with you on a periodic basis, however, should you need our services, please do not hesitate to contact us for support.

Kind Regards,
Marcus Pearson
Business Development Manager
